SOLID CORE COMPOSITE DOORS

The Endurance Range - the peak of security

In today's world of adverse weather conditions and ever increasing crime figures, there is a growing need for people to feel safe and secure in their own homes, protected from both intruders and the elements. With this in mind we have created the Endurance range, a weatherproof, low maintenance residential door designed to give you an attractive entrance and peace of mind.

Secure and Safe!

The Endurance range has been tested to the police preferred security specification of PAS 23/24 standard and has received full accreditation.

PAS 23 accreditation is given after independent testing to various extreme weather conditions and assures that a door is fit for purpose.

PAS 24 accreditation is given after independent testing for withstanding various physical intervention methods, which replicate common attempts at burglary.

In both tests the Endurance range exceeds the required standards.

Style - The beautiful moulded and richly grained exterior surface has the look and feel of traditional timber without its environmental and maintenance disadvantages. Available in a range of colours and wood grains with white and wood grain frames, the Endurance range comes with a stunning selection of hand crafted glass patterns to perfectly suit your own style and individual taste.

Insulation - Due to its 48mm thick solid core the Endurance door has a high thermal and sound insulation compared with many doors.

Strength - The Endurance range offers a 48mm thick solid core of weather resistant resin bonded laminated veneer lumber which is 10% thicker than most alternative foam filled GRP composite doors. This makes the Endurance range one of the most impenetrable door systems available today.

This incredibly thick solid core has been tested and fully certified by the British Board of Agrément (BBA).

The combination of its solid core and Secured by Design high security multi point locking system, centre deadbolt and 72mm thick PVCu reinforced frame makes the Endurance door capable of foiling the most determined intruder.

Durability - The moulded through colour outer skin, bonded to its solid core, combined with fully sealed edges create a door that is guaranteed not to warp, twist or flake. All doors have a guaranteed colourfastness that will never need to be painted.

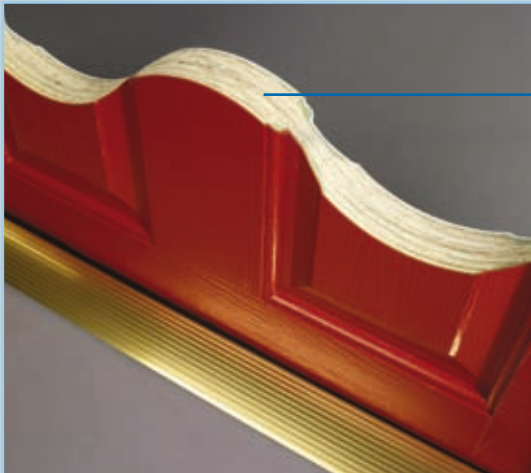

Environmentally Friendly - The laminated veneer core is fully environmentally accredited which includes PEFC & full BM Trada 'Chain of Custody'. All the timbers used are harvested from forests that are managed to meet the social, economic and ecological needs of present and future generations. The timber core is fully enhanced with BBA certification and CE marked to EN 14374.

Each Endurance door set is entirely manufactured in the UK to minimise our carbon foot print.

Solid Core & Inner Strength

For the householder who is looking for peace of mind the Endurance door certainly stands out from the crowd! For strength and security the solid core is the only choice.

Substantial solid laminated veneer engineered
lumber core, secure, strong and resistant.

Thermal and sound insulation.

The solid core is amazingly robust and offers excellent lateral strength, stiffness and structure. This is recognised by successful testing by the BBA. Multiple veneers of resin bonded lumber combine to form one of the most impenetrable doors on the market today.

Every Endurance door is fitted with the latest high security cylinders. This ensures that each Endurance door lock is resistant to everyday door attacks.

Door Furniture, Options & Accessories

To enhance the classic good looks and give additional security, the Endurance door comes with a wide range of quality door furniture and accessories as standard. Our furniture includes a choice of door knocker, a security spyhole, a classic letterbox and a choice of a lever or pad handle.

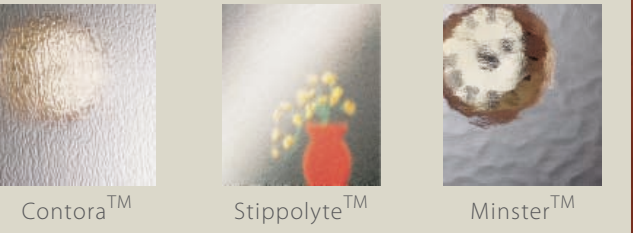

Door Colours:

Patterned Glass:

Each decorative door design is shown with a clear backing glass as recommended. Patterned glass options include:

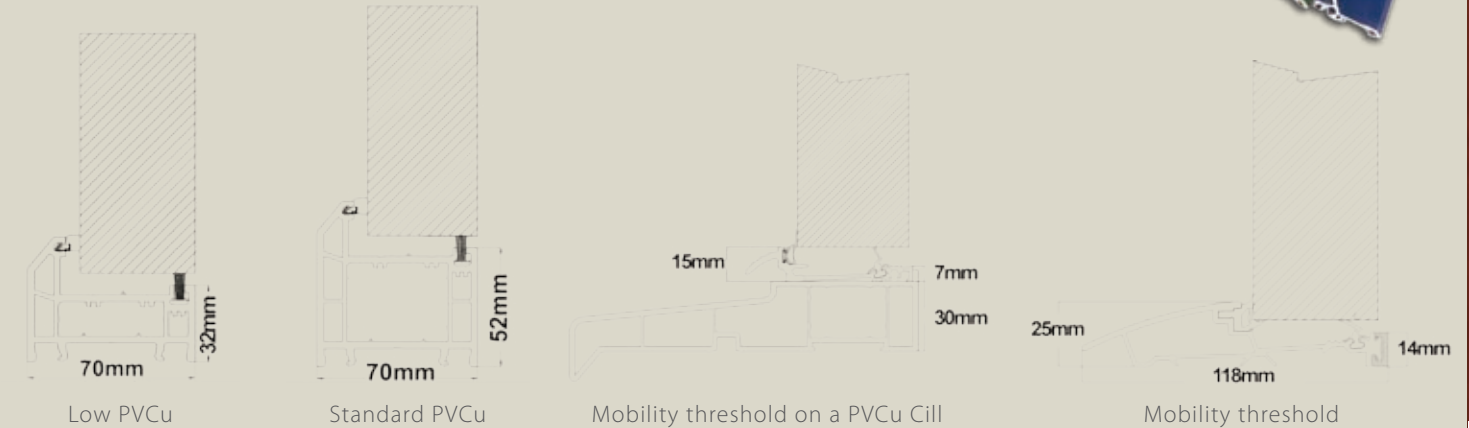

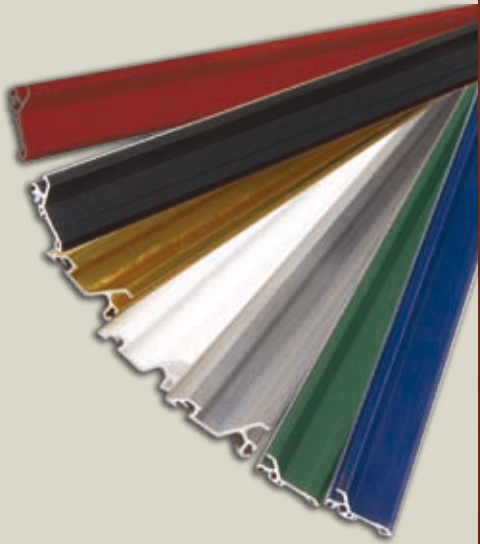

Threshold / Rain Deflectors:

The Endurance range offers a selection of coloured rain deflector options including Blue, Green, Red, Black, White, Bronze, Anodised Silver, Bright Gold and Bright Silver.

Each threshold is a perfect barrier to extreme weather conditions, efficiently deflecting rain, snow, hail and sleet away from the entrance of your home.

All Endurance doors can be fitted with the choice of four thresholds, which is ideal for the disabled and those with mobility problems, presenting no obstacle to wheeled traffic.

All colours are a visual representation only. We recommend you see colour samples. Slight variations in colour and finish may occur due to the handcrafted nature of the product or the limitations to the printing process. All information in this publication is provided for guidance only and is given in good faith. As it is company policy to continually improve products and materials, changes to specification may be made from time to time without prior notice.
